

# LAMINATION FILM FOR SHEET

# Britton TACO

Forming part of our Technical family of products, **Britton Taco** has developed a range of films for in-line lamination to thermoplastic sheet materials for thermo-forming applications.

All the films within the range are of **multi-layer construction** and are formulated to give a **strong bond on contact layer** combined with a **choice of seal characteristics** on upper layer. They also offer very good **clarity** and **gloss**, which are particularly important in clear laminates.

### Capability:

Products are available in widths 200mm to 2300mm

Thickness range: 40-100 microns

Colour: As requested, many standard colours are available.

## Britton Taco Limited

Road One, Winsford Industrial Estate  
Winsford, Cheshire, CW7 3RD

## Seal Systems

### Lock-up

High seal strength giving excellent pack integrity.

### Peel Seal

System gives peel seal without specific use of lidding film.

Seal 'whitens' on opening to indicate tampering.

## Bond Layers

Options are available for permanent bonding to PVC, Polyesters and Polystyrene base sheets.

Established in 1973, the Britton Taco site in Winsford, Cheshire, is one of the largest polyethylene film plants in Europe.

High levels of quality and technical expertise, coupled with plant versatility and flexibility make BrittonTaco an established market leader.
