

Britton TACO

Britton Taco continue to lead the field in the design, development and manufacture of mono and co-extruded technical films for demanding performance-critical applications.

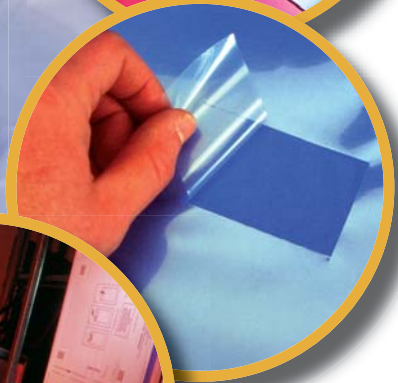

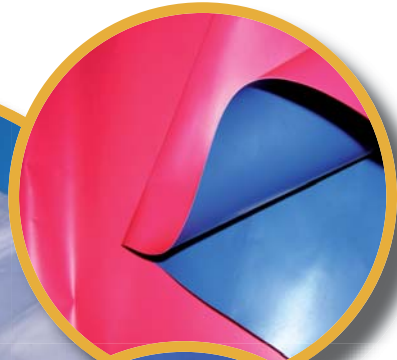

Continuous investment has enabled us to offer the use of flexible small lines through to the latest in large-scale high volume, state-of-the-art equipment.

With our **co-extrusion capability** (which accounts for almost half of our total capacity), we are able to offer film solutions to even the most challenging problems, either from our existing range, or bespoke.

A **dedicated in-house product development team**, with many years experience in this industry, enables us to offer a truly flexible and unique service.

Examples of end use applications:

- Active packaging
- Labels & tapes
- Lamination
- Liquid packaging
- Mailing
- Print & conversion
- Security & cash handling
- Surface protection
- SWS treated both sides

Established in 1973, the Britton Taco site in Winsford, Cheshire, is one of the largest polyethylene film plants in Europe.

We utilise the latest in plastic production technologies and quality testing methodologies to manufacture blown, cast and co-extruded film products for many internationally renowned commercial and household names.
