# Leaders in quality film technology

- £135 million+ Britton Group sales
- A major European producer
- Multi-site operation
- Cast and blown film technology
- Mono and co-extrusion capability
- Group print, lamination and conversion facilities

**With £70 million annual sales and 30 years of manufacturing experience, Britton Taco operates from one of the largest single-site film extrusion facilities in Europe.**

As a member of the Britton Group, we represent a major force in the film and packaging sector - providing the service, quality and product range for all of your extrusion, print, lamination and conversion needs.

The company philosophy is one of continuous improvement, both in product and process technology - driven by a commitment to quality, service and innovation at every level.

Our comprehensive product portfolio meets and exceeds the demands of many internationally renowned household names. These global blue chip clients benefit from a tailor-made service that embraces the latest in both blown and cast extrusion technology, and one which is delivered with an unrivalled flexibility.

Flexible film products for diverse applications, including:

- Construction and heavy industry
- Food and beverage
- Furniture and appliance
- Household goods
- Hygiene and medical
- Labels and tapes
- Liquid packaging
- Mailing, banking and security
- Paper
- Print / conversion / lamination
- Surface protection

# Innovative

taylor-made **solutions**

- Cast and blown film technology
- PE, PP and Co-polymers
- Printing up to eight colours
- Lamination facilities
- Embossed films

**Our product portfolio is constantly evolving in line with the developing needs of worldwide markets.**

We work hand in hand with our clients, creating product development programmes that are designed around their exacting needs.

It's a relationship based upon confidentiality, partnership and trust - underwritten by our unrivalled technical resources and machine capabilities.

The result is a solutions-based approach that is instrumental in helping our customers to maintain and improve their market performance.

- Bespoke technical solutions
- Individual development programmes
- Complete confidentiality
- Dedicated in-house product development team

# Passionate about quality

**A quality culture permeates at every level within Britton Taco, and we are passionate about maintaining our lead and continually improving our performance in this area.**

All our films are developed, produced and tested in a controlled environment using the most advanced equipment. The application of rigorous inspection regimes guarantees that every product will perform to consistently high standards.

We are justifiably proud of our BRC/IOP certification, which serves as your guarantee that you are dealing with a company that ensures strict house-keeping and that consistent quality is maintained at all times. The packaging products that we supply conform to the very highest standards of food safety.

This, together with our ISO9001 : 2000 accreditation, gives you the peace of mind that you are buying a product that will meet even the most exhaustive of modern packaging standards.

- Approved to recognised quality standards
- ISO 9001:2000
- BRC/IOP Certified
- Accredited testing facilities
- Dedicated quality team

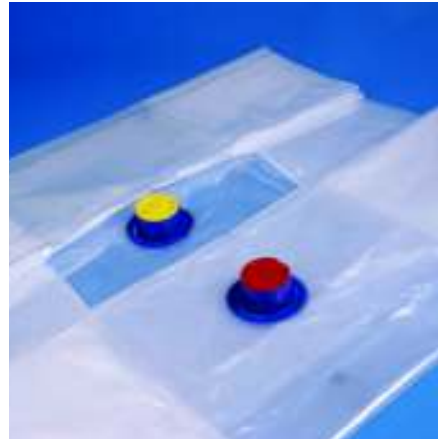

# Technical films

at the  
cutting edge  
of technology

**Britton Taco continue to lead the field in the design, development and manufacture of mono and co-extruded technical films for demanding, performance-critical applications.**

Continuous investment has enabled us to offer the use of flexible small lines through to the latest in large scale, high volume, state-of-the-art equipment. With our co-extrusion capability (which accounts for almost half of our total capacity), we are able to offer film solutions to even the most challenging problems, either from our existing range or bespoke.

A dedicated in-house product development team with many years experience in this industry, enables us to offer a truly flexible and unique service.

## End use applications

- Lamination
- Liquid packaging
- Mailing
- Print & conversion
- Security & cash handling
- Surface coating
- Surface protection
- SWS treated both sides

# Flexlite™ Stretch Hooding

**Over recent years, developments in alternative wrapping equipment have led to systems that are based on stretching rather than shrinking covers over palletised loads. This system (termed “stretch hood”) utilises a film with a high elasticity.**

This elastic nature allows the film to be stretched over a load to snap back tightly, holding the load when released.

Britton Taco has worked closely with both materials and machinery suppliers to offer a range of films with consistent performance suitable for use on all the major wrapping units. One film size will wrap a number of pallet formats.

We offer full technical support, both pre and post manufacture, to ensure all our customer needs are met.

- Consistent performance
- Superior holding forces versus alternatives - even at elevated temperatures
- Excellent seal performance allows for increased cycle times
- Excellent optical properties when compared to our competitors hoods
- Superb puncture resistance with high tear strength.

# Industrial films

tough, flexible,  
& affordable

**The industrial film market demands tough films for tough applications. Britton Taco offers a comprehensive choice in this market - products such as high performance stretch films, sheeting, top sheets, stretch hooding, gusseted and centrefold pallet covers in shrink and non shrink formats.**

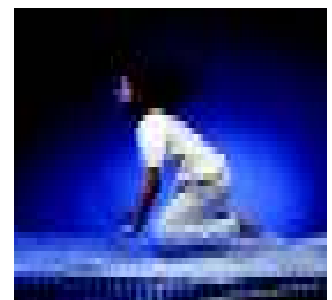

Competitive pricing, product quality, consistency, innovation and customer service have afforded us a broad customer base - from the smallest user, to the largest household name.

Our long history of operating within this market sector demonstrates that we not only have the ability to provide films that perform consistently, but also a range of equipment capable of providing a diverse range of product thickness and widths.

This flexibility in manufacture allows us to offer a comprehensive product range, yet still respond to urgent customer demands and tight schedules without compromising on quality or performance in a reassuringly reliable way.

Tough, adaptable and affordable; this range ensures that our customers' products benefit from strong, flexible protection from the warehouse right through to the point of delivery - optimising throughput and saving money.

- Competitive
- High performance
- Volume production
- Rapid delivery
- Flexibility

# Collation shrink film

we've got it covered

**Britton Taco, along with its sister company Britton Merlin, uses advanced technology to produce a comprehensive and unrivalled choice of clear and printed collation shrink film products.**

All our customers' requirements in this area are met from our two dedicated manufacturing facilities in Cheshire and Lincolnshire.

We use the latest mono-layer and co-extrusion technology to add value to your processes - from purely functional plain film, through to high-quality printed designs in up to eight colours for consumer multi-packs.

The standard, Duralite™ and Vision ranges are constantly evolving to offer lighter, stronger, and clearer shrink films to satisfy the ever-changing needs of this demanding market.

Our long established links with all the major single feed and twin feed machinery suppliers enable us to offer expert advice on the optimum film choice for your equipment.

- Single-feed collation films
- Twin-feed collation films
- Duralite™ super-high yield
- Vision - high clarity
- Non-fusion
- Laminated shrink
- Print up to eight colours

# High performance stretch films

**Stretch film is perfect for the protection of goods during warehousing and transport, as well as reducing tampering in transit / storage.**

Supplied for both machine and hand application, this film is suitable for wrapping, covering and binding, offers protection without the need for tape or adhesive and is ideal for securing cartons together on a pallet and / or irregularly shaped loads.

All customers can be assured of film that offers very high puncture resistance, excellent clarity and appropriate cling and tack levels.

## Machine film

Cast and Blown machine films are generally applied to palletised products where it is easy for the pallet to be transported to the stretch wrap machine e.g. end of a production line.

### Blown Machine Film

All standard and power pre-stretch grades (PPS) produced.

Various specifications supplied from stock.

### Cast Machine Film

All standard and PPS grades supplied from stock.

Standard specifications are:

500 mm x 2,100 metres x 17 mu

500 mm x 1,800 metres x 20 mu

500 mm x 1,500 metres x 23 mu

All standard specifications are packed 46 rolls per pallet.

Non-standard specifications can be ordered and stocked for call off.

## Hand applied film

All hand rolls produced at Winsford are blown in a variety of specifications.

*Options:*

LLDPE Produced in standard 400 and 500 mm widths. Thicknesses : 13 - 50 micron.

Standard high performance and metallocene grades.

Wound on standard or extended cores which allow hand wrapping without the need for a dispenser.

Packaged in boxes of six, or bulk packed and bulk stacked.

Available in clear, blue, or black as standard.

Black opaque stretchwrap is available for applications where security / confidentiality is important.

# Hygiene & medical disposables

personal healthcare  
in the 21st Century

**Britton Taco is a major global player in the supply of films for the hygiene disposables market.**

Using state-of-the-art equipment, we process an extensive range of polymers and additives, producing tailor-made films for a large number of personal hygiene products.

A unique feature of our service is the ability to produce both cast and blown embossed films using the latest co-extrusion technology.

**The medical and surgical market has been steadily moving towards single-use disposable products for reasons of hygiene and safety for both patients and operating room personnel.**

As an established supplier within this sector, we provide a variety of flexible films for a number of these critical medical and surgical applications.

Typically these feature as a composite layer in the manufacture of patient and equipment drapes / covers and in surgical gowns.

# Ready to serve our customers

## ■ Our Vision

To be the UK's most innovative and customer focussed flexible packaging manufacturer.

## ■ Our Mission

To offer world class service levels, outstanding quality and innovation that continuously exceeds customer expectations.

**Throughout Britton Taco, we strive to achieve unrivalled levels of service and technical support.**

Our consistently high levels of pro-activity have generated and secured positive growth from both existing and new potential business.

The ability to honour lead times, provide unrivalled personal service, and set the benchmark for quality and customer satisfaction is paramount to that achievement.

Worldwide customers represent the lifeblood of the business, which is why our people are specially trained to listen, and respond to their individual needs.

Whether you have a query about a delivery, or need urgent advice from a technical expert, our friendly advisors are always available.

- Friendly trained staff
- Technical & Sales support
- UK and international distribution
- Quick turnaround
