

Britton TACO

Stretch film is perfect for the protection of goods during warehousing and transport, as well as reducing tampering in transit / storage.

Supplied for both **machine and hand application**, this film is suitable for wrapping, covering and binding; offers protection without the need for tape or adhesive; and is ideal for securing cartons together on a pallet and/or irregularly shaped loads.

Machine film

Cast and Blown machine films are generally applied to palletised products where it is easy for the pallet to be transported to the stretch wrap machine e.g. end of a production line.

Blown and cast machine film

Blown machine film is produced to order.

500mm x 2,100 metres x 17mu
500mm x 1,800 metres x 20mu
500mm x 1,500 metres x 23mu

All standard and power pre-stretch (PPS) cast machine film grades are supplied from stock.

All standard specifications are packed 46 rolls per pallet.

Non-standard specifications can be ordered and stocked for call off.

Established in 1973, the Britton Taco site in Winsford, Cheshire, is one of the largest polyethylene film plants in Europe.

High levels of quality and technical expertise, coupled with plant versatility and flexibility make Britton an established market leader.

All customers can be assured of film that offers very high puncture resistance, excellent clarity and appropriate cling and tack levels.

Hand applied film

All hand rolls produced at Winsford are available in a variety of specifications.

Options:

- LLDPE produced in standard, 400mm, and 500mm widths; thicknesses: 12-50 mu.
- Standard, high performance, and metallocene grades.
- Wound on standard, or extended cores which allow hand wrapping without the need for a dispenser.
- Packaged in boxes of six, bulk packed or bulk stacked.
- Available in clear, blue and black as standard. Other colours are available to order.
- Black opaque stretchwrap is available for applications where security / confidentiality is important.

HIGH PERFORMANCE STRETCH
